INFR3120 – Web and
Scripting
Programming

Our web application, DueDesk, is a simple and efficient assignment tracker for students. Users create an account and log in to securely manage their tasks. They can add assignments with details like title, course, due date, and status. DueDesk automatically shows how many days are left and sorts assignments so the closest deadlines appear first. Students can quickly edit, delete, or mark tasks as complete, making it easy to stay organized and on top of their workload.

TASK LIST PART 2

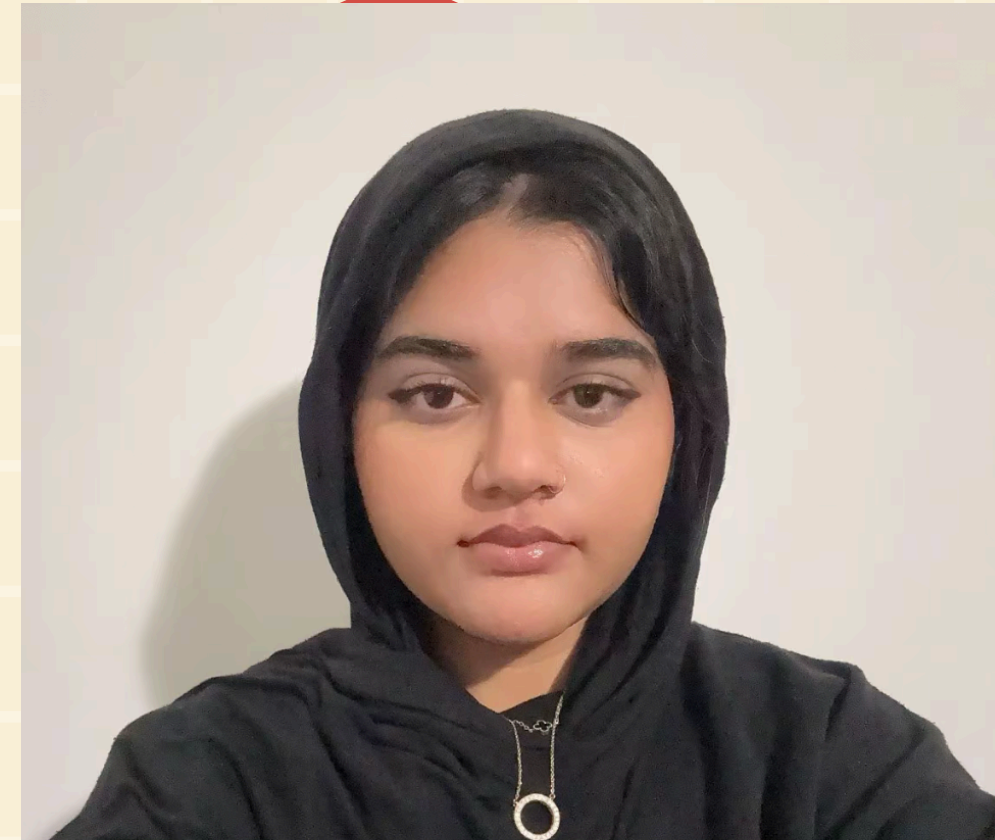

TASK	MEMBER
downloaded passport and implemented authentication, including login and register pages,	IMAN
Developed Homepage, added About info, Getting started info, added button for navigation link to registration page	SHAWNZEY
DEPLOYED WEB APPLICATION CREATED SLIDESHOW	SHAWNZEY
Recorded web application video	Iman
VIDEO	Shawnzey/Iman
